

CBC SAVES PROCESSING PLANT \$5,800 WITH URGENT DELIVERY SOLUTION

Our Challenge: To provide a large processing plant with urgently required stud bolts for planned maintenance over the Christmas/New Year period. While road freight was relatively cheap at \$400, delivery would have taken 7 days, requiring the plant to shut down, incurring a loss of \$35,000.

Solution: CBC organised a special airfreight charter for the 1.5 tonne order, at a cost of \$29,600. The stud bolts were received by the plant next day.

Result: The processing plant was able to perform the planned maintenance with minimum disruption, saving them \$5,800.
