

CBC and SEALCOM SAVE PULP & PAPER MILL \$2,750pa IN ENERGY ON STEAM LINE VALVE

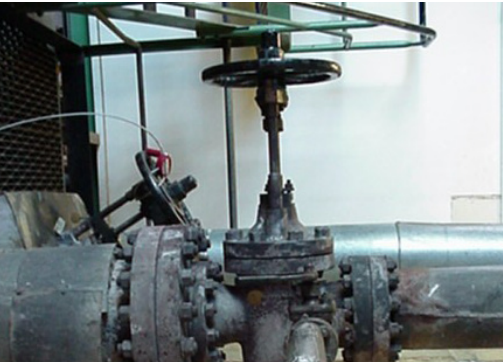

Our Challenge: To reduce energy loss and OHS hazards associated with leakage in steam lines and valves.

Solution: CBC and Sealcom designed a Beldam Crossley valve cover to suit the application's dimensions.

Result: The installation minimised the risk of exposure to injury and the thermal protection provided by the cover reduced energy loss by \$2,750 pa on just one steam valve.

Steam valve before cover installed

Steam valve with cover installed
